WORK EXPERIENCE

ANDROID DEVELOPER (REMOTE)

Style Theory | Sep 2018 - Sep 2020

- Creating android apps (Customer and Operation) using Java / Kotlin with MVVM concept.
- Work with users to define requirements and translate them into an app feature.
- Ensuring good code quality, structured, using unit tests, and guaranteed clean code.
- Refactoring, optimizing and continuously improving code efficiency.

ASSOCIATE TECH LEAD IN OPERATIONS

Style Theory | Sep 2019 - May 2020

- Lead and managed a team of 11 consisting of developers, QAs and product designers
- Arrange the Design validation, Story Refinement and Scoping the Feature developments
- Liaised with multiple stakeholders in order to maintain shared expectations between the multiple parties
- Drive the product development starting from architecting a solution to ensuring proper testing has been done before it is deployed to our operations team
- Worked closely with Operations, Data, and Product teams to maintain compliant data consistency and to produce a refined backlog of future product developments
